

The Vakta

(नौ तीन नौ नौ चार तीन सात आठ पांच एक)

The Vakta News – Homepage Redesign Document (Detailed Version)

Overview

The Vakta News aims to evolve its website into a modern, responsive, and feature-rich news platform, inspired by major Hindi news portals like [Jagran](#), [Nai Dunia](#), and [Patrika](#).

This document covers design specifications for:

- Hero Slider
- Subscribe Popup
- Breaking News Ticker
- Mobile Sticky Navigation
- Web Stories Section
- Additional UI/UX Improvements

1. Hero Slider (Top Section)

Purpose

The Hero Slider highlights the top headlines or editor-picked news stories in a visually compelling format to immediately engage the visitor.

Layout Specification

Element	Description
Full-width Container	Occupies 100% width of screen on desktop and mobile
Height	~60% of viewport height (adjustable for mobile)
Slide Background	News thumbnail or featured image, fully stretched
Overlay	Semi-transparent dark gradient from bottom
Category Tag	Text overlay at top-left of content (e.g., "राष्ट्रीय")
Headline	Large, bold, clickable news headline
Short Description	Optional 1–2 line summary (visible on desktop)
Date/Time	Show publication time or date
Navigation	Left/Right arrows + Dot indicators
Auto-slide	Every 5–7 seconds with pause on hover
Manual Control	Swipe/tap on mobile, click on desktop

Functional Requirements

- Responsive behavior
- Support for swipe (on touch devices)
- Dynamic content integration (latest or featured posts)

- Lazy load images for faster performance

2. Subscribe Popup (Newsletter / Alerts)

Purpose

Capture visitor contact data (email or phone) for push notifications, newsletters, or WhatsApp alerts.

Trigger Conditions

Type	Details
Time-based Trigger	Appear 10–15 seconds after page load
Scroll-based Trigger	Appear when 50% of page is scrolled
Session Control	Show only once per session using cookies/localStorage

Design Layout

Element	Description
Modal Window	Centered box with white background and soft shadows
Background Overlay	Black with 70% opacity
Heading	Bold message (e.g., "Subscribe for Breaking News Alerts")
Subtext	Small line describing the benefits

Input Fields	Name (optional), Email or Mobile Number (required)
Submit Button	Bold button with clear CTA: "Subscribe Now"
Close Button	Cross icon on top-right corner
Success Feedback	Message like "Thank you for subscribing" after submit

Functional Features

- Form validation (email/mobile format)
 - Store data in the database or integrate with:
 - Mailchimp
 - WhatsApp API
 - Firebase or custom email marketing system
 - Error handling (invalid input, already subscribed, etc.)
-

3. Breaking News Ticker

Purpose

Keep users informed of live or breaking news in a ticker format like TV news channels or top portals.

Design Elements

Element	Description
Location	Fixed at the top (above or below header)

Style	Horizontal marquee or sliding carousel
Content	Breaking news headlines (auto-updated from CMS)
Timestamp	Optional publish time or "Breaking" label
Link	Each headline links to its news detail page
Controls	Option to pause/resume scrolling

4. Web Stories Section

Purpose

Highlight trending stories in a mobile-first visual format inspired by Instagram/YouTube stories.

Position

- Just below the Hero Slider on desktop
- In a separate "Stories" tab or section on mobile
- Include a floating "View Stories" button on mobile

Design Features

Element	Description
Carousel Style	Horizontal scroll with touch/swipe support
Story Card	Circular or rectangle thumbnail with short title
Badge/Icon	"Story" or "New" label on each card

Autoplay Support	Autoplays content when clicked
Lightbox/Fullscreen	Opens in a fullscreen story view (carousel mode)
Integration	Supports video, image, or interactive content

5. Mobile Sticky Bottom Navigation

Purpose

Provide app-like navigation on mobile to improve engagement and usability.

Design Layout

Element	Description
Placement	Fixed at the bottom of the screen
Number of Items	4 to 5 buttons (with icons + labels)
Sample Tabs	Home
Interactivity	Highlight active tab, smooth transitions

6. Additional Recommendations

Performance Optimization

- Enable lazy loading for images and videos
- Use WebP format for images

- Minify CSS and JS
- Use a CDN for assets

SEO Optimization

- Schema markup for articles
- Open Graph tags for social sharing
- Optimized headline structure (H1, H2)

Accessibility

- Alt tags on all images
- Keyboard navigation support
- High contrast text on images

Summary Table

Feature	Priority	Device Focus	Implementation Method
Hero Slider	High	All	Swiper.js / custom
Subscribe Us Popup	High	All	Modal with triggers
Breaking News Ticker	Medium	All	Auto-scroll headline feed
Web Stories Section	Medium	Mobile	Story viewer integration

Bottom Navigation (Mobile)	Medium	Mobile	Fixed tab bar at bottom
Performance Enhancements	High	All	Lazy load, CDN, minification
SEO & Accessibility	High	All	Best practices implementation
